(54) Title: **MUSICAL AUDIBLE ALERT TERMINATION**

(57) Abstract: A mobile telephone terminates the musical audible alert for an incoming call by introducing a replacement musical sequence. The mobile telephone comprises: audio output means for alerting a user to an incoming call by playing a musical audible alert; a user input for answering an incoming call; and control means, responsive to the user input, for controlling the audio output means to terminate the musical audible alert, wherein the audio output means is operable to terminate the musical audible alert by introducing a replacement musical sequence.
